## FACIAL RECOGNITION

Automatic Face Recognition for Access Control Power by Artificial Intelligence (AI)

# FACIAL RECOGNITION

## ZOOMFACE

### What is ZoomFace ?

- ZoomFace is an integrated system which uses a compact biometrics platform hosted in gates and barrier
- Enables fully automatic access control, driven by face matching
- Incorporates some of the industry's latest & most advanced biometrics technologies for facial recognition
- Real-Time Admission Control System used for commercial buildings and secured campus environments
- Automated monitoring of every face entering and leaving the building or campus
- Ideal for fast and seamless access in a high-volume human traffic environment with multiple gates, entrances/exits

## ZOOMFACE

### Key Features

- High accuracy of 99.6%
- High capacity database gallery with a storage of 300,000 users at every gate or barrier
  - \* Capability to store up to 2 million user data
- Instant validation against the local database (in less than 0.2 seconds) to support a gate flow rate of 30 - 40 people per minute
- Gallery can be instantly updated by either internal or external sources
- Compatible with most premium gates and barrier systems
  - \* Exclusive features on ZoomGates only
- Can be managed and configured from our GUI-Based Self-Enrollment Kiosk
- Centralised Visitor Management System (VMS) unit for controlling of multiple gates
- High accountability with track records of every entry/exit:
  - Face Log File
  - Gate Log File
- Each gate can operate independently
  - \* Operate with UPS back-up
- Proprietary Software for safer and secured access

### ZoomFace Visitor Management System

#### EASY SELF-ENROLLMENT 3 SIMPLE STEPS

Snapshot

Face Match

Seamless Entry
